

NEW DOOR COLLECTION

# SLIM CAVA

SHAKER, SLIMMED DOWN

**Refined tradition.**

The classic five-piece shaker door, redrawn with narrower rails — considered, understated, lasting.

ENGINEERED IN 22 MM · BY LIOHER

Picasso 2

WHY SLIM CAVA

# SHAKER LINES. MODERN PROPORTIONS.

A traditional rail-and-stile build, trimmed to a narrower profile — so the door reads as architectural detailing rather than period reference. Finished with PUR tech edge-banding for maximum moisture and steam resistance.

## 22 MM THICKNESS

Substantial slab that contrasts with the slim rail profile.

## PUR TECH EDGE BANDING

Highest resistance to moisture, steam, and daily heat.

## SOFT CORNER EDGES

European routing produces gentle, hand-finished radii.

## ZERO EDGE LINE

Invisible glue line — a single, continuous surface.

## PRECISE DIMENSIONS

Manufactured to  $\pm 1/32$ " tolerance — installs clean every time.

## 5-YEAR WARRANTY

Every Lioher door backed by a full 5-year guarantee.
